

**WHAT IS MEDLIFE FOUNDATION?**

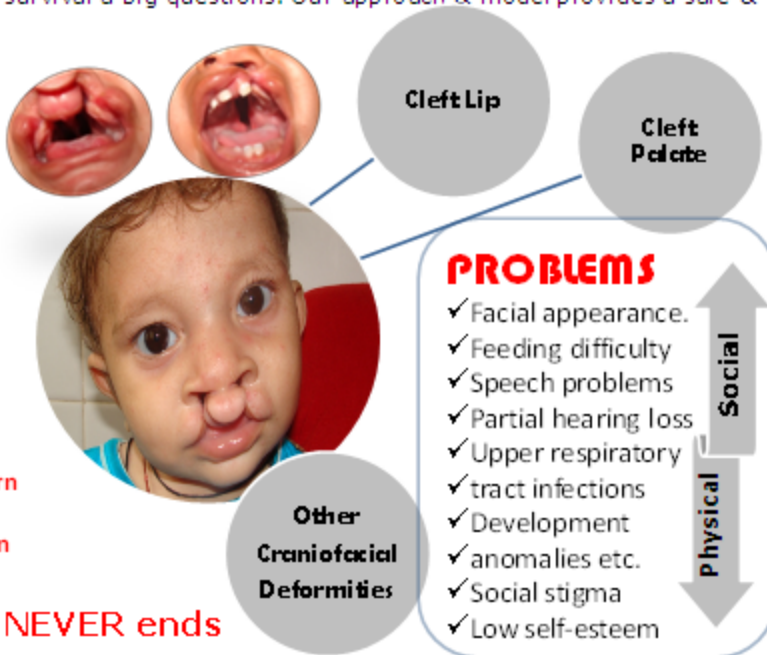

Medlife Foundation is an international charity with a goal to help every child suffering from facial birth deformity like cleft lip & cleft palate living in rural areas of developing countries who have no other resources to get treated. Currently Medlife Foundation works with partners in India who have provided free surgeries to thousands of children living in rural areas and extreme poverty and many more are still waiting for a 51 minute surgery that can transform their life forever who have no other resources to get treated. If untreated they face many physical, social as well as psychological issues making their survival a big questions. Our approach & model provides a safe & quality care

❖ In many developing countries 75% children are untreated due to poverty.

❖ Only 275 \$ provides 100% free surgery, medicines, physician consult, anesthesia & hospital stay for one cleft operation.

❖ There is no vaccine or medicine to prevent cleft deformity but research is going on.

❖ Almost 1 in 800 children are born with such deformity & worldwide every 3<sup>rd</sup> minute a cleft child is born somewhere.

**PROBLEMS - That NEVER ends**
